

FORENSIC AUTOPSY REPORT

Case ID: FRNS-2026-1184
Victim: Arun Kumar
Location: Room 204, Industrial Building

External examination revealed penetrating abdominal trauma with a sharp-force injury measuring approximately 4 cm in width. Defensive injuries were identified on the left forearm and right palm, suggesting an attempt to resist assault. Additional blunt-force trauma was observed near the left temporal region.

Estimated time of death is between 9:30 PM and 11:00 PM based on body temperature, rigor mortis, and scene conditions.

Toxicology screening detected elevated alcohol levels but no narcotic substances.

Investigative anomalies identified: Blood footprints did not match victim footwear size. Bloodstained blue shirt hidden inside fire hose cabinet. Tool bag recovered near scene suggesting possible premeditation. CCTV correlation indicates suspicious vehicle activity before incident. Cause of death is consistent with penetrating abdominal trauma caused by a sharp-force object.
